

I. BaonBalance

II. Problem Statement

Students often have a limited amount of money for their daily school expenses aka "baon". When buying food and drinks in the canteen, some scholars tend to lose track of how much money they are spending and may sometimes accidentally spend more than their available budget. This can lead to them not having enough money for other important needs. Solving this problem is important because it can help students avoid losing more money than the amount of money they already have.

III. Project Objectives

- To calculate the total cost of a student's selected items based on their prices and quantities.
- To determine whether the student's budget is enough to pay for the selected items.
- To display the remaining balance of a scholar or the amount needed if the budget is insufficient.

IV. Planned Features

- It will allow the user to enter their available budget.
- Allow the user to enter the price and quantity of food and drinks.
- Calculate the total cost of **all** selected items.
- Compare the total cost to the available budget of the user.
- Display the remaining balance of the user after subtracting the cost to the budget.
- Display the additional amount of money needed if ever the budget is insufficient.

V. Planned Inputs and Outputs

Inputs:

1. Available budget
2. Name of the food/drink
3. Price of each item
4. Quantity of each item

Outputs:

1. Total cost
2. Remaining balance
3. Amount needed if the budget is insufficient

4. Budget status ("Within budget" or "Insufficient Budget")

VI. Logic Plan (Pseudocode)

START

INPUT available_budget

DISPLAY available_budget

INPUT number_of_items

SET total_cost = 0

FOR each item:

 INPUT item_name

 INPUT price

 INPUT quantity

 SET item_cost = price × quantity

 SET total_cost = total_cost + item_cost

END FOR

DISPLAY total_cost

IF total_cost ≤ available_budget THEN

 SET remaining_budget = available_budget - total_cost

 DISPLAY "Within Budget"

 DISPLAY remaining_budget

ELSE

 SET needed_money = total_cost - available_budget

 DISPLAY "Insufficient Budget"

 DISPLAY needed_money

END IF

END
